

Welcome Booklet

A must read !

Welcome in **La maison de Daniel**.
We hope you will have a pleasant stay.

This welcome booklet is intended for you to quickly familiarize with the house's equipments, but also to inform you about the village. It is obviously not exhaustive and we will be delighted to receive your comments and ideas to improve it.

Before going further, we want to give you some general advices :

- Please read the important informations on page 4.
- For the comfort of all tenants, we ask you not to smoke inside the house. You have ashtrays that you can use at your convenience on the terraces.
- We chose to keep the Provencal furniture in the house. We have completed the furniture (kitchen, terrace, beds) so that the house is more functional. To prevent damage, please do not move furniture from room to room or from floor to floor.
- Finally, you will certainly have neighbors around you (tenants or owners). Thanks for taking it into account.

The house

Important informations

For safety reasons, the chimney is not usable. If needed, you have radiators in the sleeping areas and a heated towel rail in the bathroom.

If you use the radiators, **please tie the curtains** so that they do not come into contact with them.

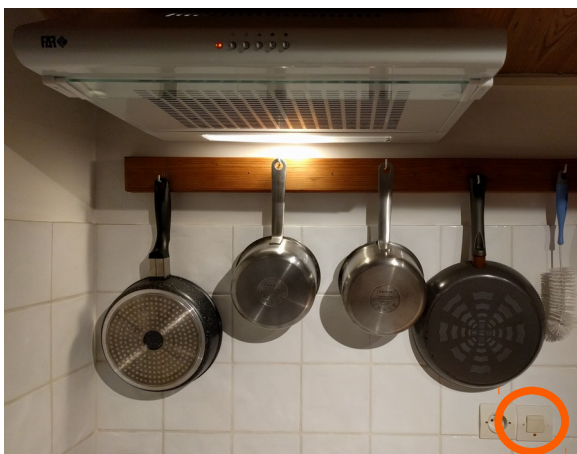

The exhaust ventilation system is programmed for automatic operation between 7am and 11pm.

Please do not intervene at **the circuit breakers** or the exhaust switch located in the passage to the kitchen.

The kitchen

The kitchen utensils are in the buffet or on this one. The dishes, placemats and trivets are in the gray wall cupboard in the dining room.

The filter hood works in connection with the wall-mounted air extractor. To turn them on, use the wall switch located just below it. You can then activate the light and filtration.

The terrace

The terrace will easily accommodate 8 to 10 people. The garden furniture includes 8 chairs and the table has extensions. Cushions for the chairs, candlesticks are in the wooden cabinet of the dining room.

The plancha works with gas. We have edited the user manual. So that everyone can fully enjoy it, we invite you to read the information of start-up and cleaning. **When the plancha is cool, remember to close the lid and / or use the protective cover if the weather is rainy.**

We would be grateful if you water from time to time the few plants that are on the terrace, in the navy blue pots. For this purpose, we left a watering can and a stepladder to access the highest pots.

The cleaning

Cleaning is not included in the service, and we thank you for leaving the house as you would like to find it on your arrival.

The vacuum cleaner is in the wall closet on the ground floor.

An iron is available in the gray wall cupboard. The ironing board is in the toilet.

For floor cleaning, you can settle for hot water without detergent to preserve the stone treatment.

You have near the kitchen sink products needed for more specific maintenance (limescale, glass cleaner, etc.) and basins.

For the plancha, a simple cleaning with water on the hot plate will suffice. Empty the grease trap (located on the left) into the container containing sawdust on the terrace.
